EDUCATION

University of Toronto

Toronto, ON

HBSc in Statistics, Computer Science, and Mathematics

June 2026

- Coursework: Software Design, System Tools and Programming, Computer Organization, Databases, Machine Learning, Data Visualization, Statistics and Data Analysis IV, Mathematical Modeling

RELEVANT WORK EXPERIENCE

Department of Fisheries and Oceans

Nanaimo, BC

Data Engineering Intern

May 2025 - Present

- Analyzed 40 years of salmon migration data to identify sampling optimizations projected to cut survey effort by 10% without reducing precision.
- Built a Python ETL (pandas) that ingests survey and lab exports (>100K rows/run), validates schema, and publishes curated tables (Parquet and SQL) for scientists.
- Shipped a Django app (PostgreSQL) for the Pacific Salmon Sampling Program enabling cross-team review and publication reference.

Ninepoint Partners LP

Toronto, ON

Software Engineering Intern

May 2023 - August 2023

- Created a full-stack website application with a C# and .NET Core back-end and JavaScript and HTML front-end and integrated Umbraco CMS for easy content updates.
- Developed complex tax calculators which improved user clicks by 10% and a data integration pipeline from an external API used for data analytics.
- Implemented an automated email messaging system to connect users with employees resulting in 30% faster response times and designed a reusable HTML/CSS framework for rapid page styling.

NYU Langone Health

New York, NY

Student Research Intern

May 2022 - June 2022

- Built R modules to simulate study data for research, leveraging dummy variables, Markov chains, and spline curves for realistic generation.
- Used R coding practices to optimize core and utility functions and improve program runtime efficiency by 20%.

PROJECTS

NHL Predictive Model, October 2025

- Built win-probability models (logistic, random forest, XGBoost) tailored for NHL game outcomes with scikit-learn.
- Developed feature synthesis and stratified validation to capture historical signals and benchmark lift.

Computer Graphics Ray Tracer, October 2024

- Applied linear algebra and calculus concepts in code along with known formulas to approximate lifelike images.

Social Media Server, March 2023

- Built a C server emulating a social-media app, managing sockets/ports for concurrent users and real-time messaging.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C#, C++, C, R, SQL, JavaScript, HTML, CSS
- **Technologies/Frameworks:** Django, SQLite, .NET Core, jQuery, Ajax, PostgreSQL, Pandas, Bootstrap, Git, LaTeX, GIS, PowerBI, nginx, Gunicorn

VOLUNTEER ACTIVITIES

Scatterbrain Magazine

Montreal, QC

Vice President, Head of Website Design

May 2024 - Present

- Co-designed and coded a re-branded website using HTML, CSS, and JavaScript

Alpha Epsilon Pi

Toronto, ON

Property Manager (2023-Present), Vice President of Internal Relations (2022-2023)

April 2022 - Present

- Manage a working budget of \$200,000 annually. Responsible for maintaining property and 10 apartments. Supervised and general contracted a \$120,000 renovation.
